Paula Rodríguez, Cloud Engineer, github.com/pauloba pauloba@tutamail.com

I'm a tech professional with a **CS degree** and experience in an array of fields including **system administration**, **infrastructure integrations**, **maintenance** and cloud **architecture**.
I have a pragmatic, results-oriented approach combined with a collaborative mindset.

Factorial [Apr 2026-present] - Infrastructure engineer

Owned **AWS** and **Azure** infrastructure via **Terraform**, **Digger**, **GH Actions + GH Workflows**.
Shipped in-house developed applications in **React + Typescript + Tailwind CSS**.
Designed a **Claude Code skill** to automate end-to-end DB creation, cutting provisioning time from 60 to 30 minutes.
Migrated requests out of untracked chat threads into in-house ticketing tool, creating a single tracked **source of truth** and **visibility** into team workload, while feeding **product feedback**.
Introduced **agentic security checks** into the code review process, **catching security-relevant** issues (linting, secret leaks, code conventions) earlier in the development lifecycle.

Vodafone [Oct 2023-Feb 2026] - Platform engineer

Owned **AWS** and **GCP** infra using **DevOps**: IaC, automated delivery, environment promotion.
Designed blueprints for multi-tenant platforms, defined **rollout strategies**, and implemented **IaC** with **Terraform** and **Terragrunt**.
Built, supported and maintained in-house **Internal Developer Platform (IDP)** based on an OSS framework: **Node.js** for the backend, **React** for the frontend.
Built and maintained **CI/CD pipelines** for apps and infra releases with **GitHub Actions**.
Paired with **AI chats** and **AI agentic** technologies to work on IDP catalog.
Used **AI** to **build out** the **IDP software catalog**, accelerating onboarding of services.

FonYou [Jul 2021-Sep 2023] - Cloud System Administrator

Deployment, operation, and support of cloud-based production systems on **GCP**. Automated processes and operations through **Terraform**, including the design, **writing**, and long-term **maintenance** of **custom Terraform modules** to standardize infrastructure delivery.
Led the deployment of **Java applications** using **Jenkins**, **Terraform**, and **Helm charts**, enabling reproducible and scalable rollouts across environments.
Troubleshooted **K8s** clusters with the help of monitoring and observability solutions with **Wazuh**, **Grafana** + **Prometheus** and **Datadog**.
Supported releases for new versions of in-house software **pairing** with **devs**.

Google via Webhelp [Jan 2019-June 2021] - Subject Matter Expert

Helped customers troubleshoot and fix **GCP integrations** via videoconference, guiding them to quick results, reviewing their logs and sharing scripts oriented to fixing integration issues.
Opened internal bugs with Google engineers, ensuring high quality, gathering logs, screenshots, code snippets and adding full technical context. Collaborated closely with engineers to solve customer and product issues by **investigating** the issues and providing **reports**.
Mentored and **guided** colleagues to **improve** team **SLAs**, **SLOs** and **SLIs**.

Created, improved and maintained **internal documentation** and provided **internal training**.

Google via Sellbytel [Aug 2017-Jan 2019] - Technical Solutions Representative

Triaged, **diagnosed** and **solved issues** related to **GCP** services, through email, phone and video conference. Experience with a **Salesforce-based ticketing system**.
Tech stack: **GCE**, **GKE**, **VPC**, **Container Registry**, **Cloud Run**, **Pub/Sub**, **IAM & Security**.

Enxendra Technologies [Nov 2016-Apr 2017] - Support and Quality Assurance

Patched Java deployments, **administered UNIX systems** (syslog, crontab, Tomcat, Java WAR deployment).
Developed Java **unit tests** with **Groovy** and **Spock**.
Experience with the Atlassian stack: **Jira**, **Confluence**, **Bitbucket**.
Tech: **Docker**, **IntelliJ**, **Eclipse**, **SoapUI**, **Postman**, **MySQL**, **Java**, **Ant**, **Maven**, **SpringBoot**.

Telefónica SOC [Nov 2015-Oct 2016] - Cybersecurity Technician

Coordinated with **CSIRT**, **CERT**, **ISP**, **web hosting providers**, **registrars** and **registrants** to stop and prevent global online fraud.
Wrote **incident reports** and **analysed incidents** for final customers.
Real time network monitoring and security incident analysis with **Cisco FirePOWER/SourceFire/FireSight** sources for **QRadar**.
Adjusted rules and fine-tuned **QRadar** (IBM SIEM) to discard and **minimize false positives.**
Referer and bank transfer **analysis**, **monitoring** of suspicious phishing connections.
Analysed and **mitigated** real time **Bank Trojans**, **Halcash**.
Experience with the **SIRIOS ticketing** system and **ITSM Remedy**.

ANSI [Jan 2015-Sept 2015] - General Secretary

Administered **WordPress website** and **designed** merchandising with **Gimp** and **Inkscape**.
Took **notes** during **assemblies** and sent **summaries** to the members via distribution list.

Vigo University [2010-2013] - System Administrator

Installed, configured and **maintained** the Campus **software** and **hardware**.
Managed **LDAP** systems, **SquirrelMail**, **print servers**, **network monitoring** software.
Managed network **backups** with **Clonezilla + Norton Ghost**.
Provided **technical support** to students, teachers and users of the Campus laboratories.

r2con [Jan 2017-Dec 2024] - Member of the congress organizing committee

Took care of different tasks during different editions from speaker onboarding to wrangling volunteers and venue logistics. Planned wrap-up social event, booking the venue, setting up ticketing, testing AV setups and coordinating chiptune live artists.

Education

Computer science degree at UVigo. Final project [pauloba/latch-plugin-mediawiki]
High level trade school: Computer Programming, at CPR Daniel Castelao
